

GCSE Press Release 24th August 2023

Raquel Martins, Rohdiyati Ajadi, Mariana Moura, Zohra Naseri

I start with a congratulations to all of our Year 11 students for all the hard work and effort over their GCSE courses of study.

With government statistics showing a decrease in results from 2022 and results more in line with Pre-Pandemic levels of 2019, we are delighted to announce a continued stability and growth in our GCSE results in 2023. We have continued to grow from the Pandemic and the stability from 2019 remains with our grades higher than this last unaffected year.

Mustafa Abdillahi
11 GCSE's at Grade 9

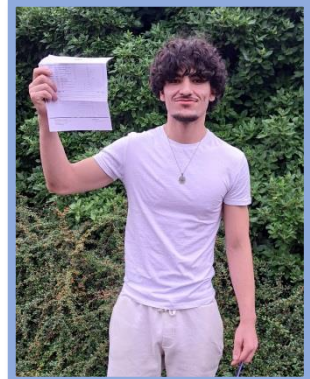

I am ecstatic with my results and so proud of what I have achieved. I'm thankful for all the support and the hard work that the teachers and support staff have put in to help myself and my year group achieve our grades. I'm excited for my next chapter where I will be studying A Levels in Maths, Further Maths and Computer Science and hope to have a career in software engineering.

A massive thank you and congratulations goes to all of our staff, teachers and associate staff who have supported and enabled this progress to continue. Everyone has contributed somewhere to enable these results and we thank all of our colleagues for producing their BEST performance, to enable our students their best performance. So many teachers today will look at these results with pride and understand the struggles so many of you have had over the last two years and how difficult this journey was. The key now remains to use the results from today to catapult you to that pathway to become the BEST version of yourself, who you can be and what you will achieve. For those who are disappointed with results, learn from this journey and keep moving forward.

Maz Mohamad

I came to the UK not being able to speak any English and I'm so proud of the results I have achieved. I have worked really hard during GCSEs and it's paid off. I would like to thank Harlington School staff for believing in me and encouraging me to be my best. I'm going to continue with the hard work studying A Levels and want everyone to know with hard work, dedication and great people behind you anything is possible. I hope for a career in the aviation industry and know Harlington will support my ambition and drive to achieve that.

Overall Harlington School is very pleased to announce that it has bucked the national trend decline mentioned by government statistics and the national press. Where it has been acknowledged, nationally, that grades were more difficult to come by this year, we are pleased to have remained stable and making progress on our headline figures. Of these figures we are above our 2019 levels and in line with our 2022 results with 54% gaining 5+ including English & Maths and 59% 5+ standard pass grades 4 and above. Particular attention should go to a rise of some of the highest 8 and 9 grades across the sciences, Maths, English and RE.

Harkeerat Singh

Doing GCSEs after Covid was difficult but I'm so happy with my results. I want to thank the Harlington Staff for all their support and guidance, in particular Mr Hayer. I am looking forward to being a member of 6th form and taking on the challenges that come with A Levels so that I can continue my education to study Cyber Security at University.

With 60% achieving a standard pass in English and Maths, this headline figure too remains in line with 2022 and have not suffered the national drop as highlighted by the press. The vast majority of students have left happy and content knowing and understanding that their hard work and sacrifices paid off. We congratulate them, their parents and the commitment made to secure these results over years of persistence and support. Alongside thanking our dedicated staff for their support, vision and belief to enable our students to succeed.

Damaso Fernandes

I came to the UK mid way through year 7 and have worked hard throughout my time at Harlington. It all paid off today when I opened my envelope and saw multiple grade 9s. I'm looking forward to studying Biology, Chemistry and Maths at A Level and hope for a career in the medical field. None of this would have been possible without the great education I have received from Harlington and I am looking forward to continuing my education journey here.

Brandon Talla

I'm buzzing!! My results are amazing - I never thought I could achieve this - and now to be taking A Levels - I'm made up! I want to thank the staff and my peers, in particular Ms Pinnock for her guidance, support and believing in me.

Congratulations and well done everyone on your results and the opportunities this brings for your continued journey to keep making progress and to keep moving forward so that you all make your mark and positive difference to this world.

Antonio D'Onofrio
